HO! FOR COOS BAY

FRIDAY MORNING, FEB. 8, 1884.

THE SCHOOL MACHINE No observer has failed to notice that our pub is school system, instead of being rarried on, as was intended, for the benefit of the public, is rapidly becoming more and more an initiation under its guidance and for the benefit of machine managers. Not by any means are all evils concentrated in the publication and the sound machine. The public school machine is repidly coming up to a point which promises to give its elder brother a close race, if not to surpass it. Lirectors are now no longer of any mean except to fulfill the callets of testens, which in turn, are controlled by the Washington editorial correspondent of the same and politicians are influenced by it. pub ic school system, instead of being rarried issuitates, which in turn, are controlled by the bestes, corresponding with those who preside even the political machine. The teachers' institute, compased of persons who have their ownlends to serve, have been suffered to take entire charge of the public schools. The decompase are more described by the public schools. The decompase are more described by the public schools. The decompase are more described by the public schools. The decompase are more described by the public schools. records are mere figure-boads or underlings, ment to the verge of spiciale. She will not be who have been shorn of all directory, and is dead of all supervisory power. Whatever publicans re-establish their dominion there. publicans re-establish their dominion there, between Eighten eight plet as possible; they surround themselvisis with the melvisis all this rubbish and flummery, and call the trolled in the south to day than there is in 1.0 all this rubbish and flummery, and call the resolt his schede of tosshing, into whose mysteries admission can be gained only by the portals of the toschers' institute. In the presence of this neomprobensible nonsense directors are helpless, apparently unable to kept up with the progress of an wondorful a science; parkint take no interest in the schools because all of them who despise shims and have good wondorful a science; and the schools because all of them who despise shims and have good wondorful as interest in the schools because all of them who despise shims and have good wondorful as interest in the schools because all of them who despise shims and have good wondorful as interest in the schools because all of them who despise shims and have good wondorful as science; the limitage of new ideas, which are sense are desposted; obtdidrob are badgored and wonfield with lotalls invitated by some matinate of the school system which, were better never leavined, or, it learned must be forgotten as soon as possible; and backers thomsolves are weaked as processed and of third dawn upon the south before it in the school system which, were better never leavined, or, it learned must be forgotten as soon as possible; and backers thomsolves are weaked. learned, or, it tearned must be toughteen as some or the passes entirely away.

It dend skelereto to wait the corner of screeks. Purtiand by Win Gardier a school to keep up their part of a shallow and Without collecting the scattered data of propedantic system, obliged to expend more grees in manufacturing and mining enterprises

learning but shows basis of simplicity, efficiency and common ende. There is no more science now in spelling in the elements of geography and gram not be attempted thurs any more than here by man, in simple division or the rule of three, than there was twenty years ago. Nor when been in its material conditions, and its regenopodiat a foctor does it appear that science is thereby greatly advanced.

In his remarkable "puff" of the chief el po to be no approbension that this desirable result the police force." Here, indeed, is sweetness tirely willing to less the chief of police be sacriobtained before, either in a public or private capacity. It will be in order new for the A bill has been introduced in the senute to

The mayor in his message says: "It seems very apparent that all legit mate sources of very apparent time of legislated at the present time, in other to lesson the burden of direct taxation on the people." A good sentiment. And, by

THE EQUALIZATION OF POLITICAL ROPCES. The New York Times thinks that the first

ness of the Danville debate in the senate proves that the sectional issue is dead beyond resur-rection. "The inquire which Mr. Sherman's conducted it will set the facts before the peo-

methods of plain learning are rojected as unworksy the second for progress of the age. What sreas will, within tweety pears, be transformed might to be due is clear enough. The directory into centers of manufacturing industry. The of the districts ought to resume nontrol of the old conditions will pass away with these industriations. or the district) organ to resume control of the schools. Emilion below the first the "professors" go. Refuse to lat the teach conditions will be equalized, and the "and dors' smatth to, its reprefentative or boss, set south will set no longer. There will the chire, and let us see if we cannot have the responsible diements of society shall control the chire, and let us see if we cannot have the responsible diements of society shall control the common school placed where it ought to be, of political, especially in municipal affairs, half attempts will doubtless be made there, as well as here, to execute that desire. But this will savage methods. The curse of the south has been in its material conditions, and its regen-

eration will be egocied through a change of

THE OREGON QUESTION.

Among other inferesting articles in the February number of the Magazine of American Storage, Grading & Packing. MUTUAL LIFE INSURANCE CO. GENTS MANK. SPECTATORS. History, published in New York, is a letter from Lyon Gardiner Tyler, which is intended to "threw some additional light on President Tyler's administration with regard to the Orpdid the president contemplate abandoning any soon to be published, is one which discluses the scheme of a triparlite treaty between the United States, Great Britain and Mexico, by which Great Britain was to have the line of the C . NEW PLANOS FOR EENT AT KOHI FR & tumbia river-we surrendering most of Washington torritory, the northern half of what was time the Judependence of Texas was to be recognized by Mexico. As Mexico was at the most recognized by Mexico. As Mexico was at the most recognized by Mexico. As Mexico was at the most repure, shirtner, they is a related the sees of most repure. time a mere colony of Great Britain, and largely indebted to her capitalists, the assent of trea-Britain was all that was necessary to the treaty, and thus the atter was desireus, may even auxious, to give. This would have reall the valuable part of that domain made pure without Polk's needless war of 1846 or the agitation of the slavery question. But apart from chief to respond with one of his customary manifestors, denouncing everythed y except the major and existing lim to the skies. The looked exclusively to the order in mind mayor and the chief, both literary men, are said to be studying together Cowper's beautiful that our claim upon the Oregon territory c said only, from the constant down of emigrants to the west, grow stronger by delay. When, therefore, Dr. Whitman presented himself at establish a forest preserve in the mountains of Washington to obtain President Tyler's came

quore in cities of more than 200,000 inhall attention it deserves. There is no ideals that the great floods and prolonged droughts which have of late years prevailed in the western surface to a temperance orator that he was states and due to the destruction of the incests intensification of the large rivers.

Surface to a temperance orator case for age intensification or the large rivers.

nergy and h bor on absurd and neeless reports. In the south, and locking at them in a compact some superintendent or boss, upon shape, it is impossible to observe how rapidly constantly increasing number of forms. the field is preparing for such manifold divisions the field is preparing for such manifold divisions the field is preparing for such manifold divisions. than in the legitimate work of the school room.

Nor is there any sign that all this superfluity of nonsense and nothing its limit. Baltimore Manufacturers' Record show that.

RARGAINS IN BUSINESS CHANGES. All city schools keep a superintendent, whose at the boginning of the present year, there were

but ones and constant study it is to add now in the southern states 1,276,422 spindles and parts to the machine, while the teachers in the 24,878 looms, an increase of 562,433 spindles country, controlled by the rules and notions of the institute, are going as far and as less folly possible in the same direction. And less folly make they through the about about about about a less than the following the interest of the same direction. And less folly make they through the about about about about about a less folly make the through the about about about about about a less folly in the south, the Carplines coming next, while tag through the sheer absurdity of its even Florida shows substantia, progress. The aethods, the institute holds frequent sessions value of the products of the southern mills was to keen the teachers no to a work which com- about \$31,000,000 in 1881; it had risen to about mos sense contemns, and to foist upon the \$40,000,000 last year. The progress in cotton achools, through them, the whole increesing manufacturing sloud during the three years make of stuff of the same kind. The school examination as conducted in the cittee and now over \$25,000,000, chiefly in the north, for cotton outending to the country is a conspicuous part of the inschess and artificial system. It arrests rapid increase of the population of mill operathe regular and legitimate work of the asheels, tives and machinists; the growth of machine torques the scholars with exercises of needless shops for the making of machinery, a stendy character, indicates little or nothing in growth of the manufacturing population. Then results, as to dapacity in useful the development of the coal and from areas of tricing but shows chiefly the de-Alabama presents another factor of population gree of proficiety which the papil may and immigration and political diversity. In a trip in the parotry required by the bres of Alabama alone wello mined last year over the mac line. Simple studies are made complex and difficult; the system is acquiring its is, like coal, apparently inexhaustible. Tenown berming/sgyfor "lings," which the child no ee. Kentucky and other southern states is fraced to commit to momory, and the plain have an immense storage of coal and from . :

ilco the mayor says that the police system of the city nearly pars its way, and there seems is permitted to occupy his place at the bend of a little while ago were wormwood and gal.. Evidently the mayor and the chief of portion of this country, without a proper police have fixed matters up again. Only a squivalent. It was his purpose to "use Oregon as the mayor was known to be or. as the handwaid to California and Texas." tirely willing to be the chief of police be sacri.

Among the notes of President Tyler to Daniel Webster, then secretary of state, which are interests, and "dica't care a --- for Bill Watkinds," and started for California. The chief fice, went charging around the city with his secusations that there was a corrupt conspirey on foot of which the mayor had knowledge asserting that a large sum of money had been knowing in sachangs the much it asserts the computation that the mayor's proposed deporture was illactions and the sachangs of the sachangs of the sachangs of the original and the origina that the mayer's proposed departure was in seord with the scheme, and he even applied for a warrant for arrest of the mayor, intimetics us a ground therefor a connection between that functionary's in leaded departure and the mency which it was alleged had been put up to effect a change in the office of chief of police. Later the mayor was found, was commelled to scorithe mayor was found, was compelled to each of the steamship ticket, and his departure such ended in the incorporation of Texas into the presented to such a degree that the mayor language such encountems on his chief as the latter never western problem would have been solved, and the whole such encountems on his chief as the latter never the such encountems on his chief as the latter never the such encountems on his chief as the latter never the such encountems of the Missouri compromise line. The whole such encountems on his chief as the latter never the such encountems of the such encounters and th

Monanta, near the northern boundary of the Confed States, between the Blackfeet and Flat- to Oregon, it fell entirely in with the magagines head Indian reservations, a region which is unsuitable for settlement, but which contributes | dut and received his cordial approval. suitable for settlement, but which contributes through the civers that flow from it, to the agricultural development of a wast tract of country. This is in necordance with the sungestion of the president, who has twice called the hierarchical country, the church temperance society of the Resorch behaviorable for a fee of Sodo for lichage to said state of more than 200,000 fulfally course in citias of more than 200,000 fulfally nated upon the public domain, and it is encouraging to Hear that there is a disposition
